Then would he be justified to the world by that internal narrative, reflecting on kings, princes, prelates and peers, and not to be published in his own day; not to be uttered without serious penalties to his kinsfolk, his family, his very body in the grave. Then, when his corpse was dust, his blood extinct, or diluted to nothingness in the course of generations; then, when all vanities of rank and state and profession and family were obliterated; when his memory and name were as a sublimated spirit; then, "in the next ages," "when some time had been passed," he would, through the cipher narrative, rise anew from the grave.
